UIET PU,CHANDIGARH

EDUCATION

Bachelor of Engineering

University Institute of Engineering & Technology (UIET), Panjab University

Information Technology

2024-2028

Bachelor of Science

IIT JODHPUR

DATA SCIENCE +AI

2025-2029

ABOUT ME

As an aspiring IoT Engineer, I am passionate about Industry 4.0 technologies and the integration of smart, connected systems. I specialize in understanding how hardware, sensors, and communication protocols come together to create efficient and scalable solutions. I approach every project with in-depth research, careful analysis, and a structured step-by-step methodology to ensure clarity, accuracy, and successful execution.

WORK EXPERIENCE

PSCST – Capstone Project Lead

Led a multidisciplinary project focusing on IoT system development and smart automation.
Responsibilities included:

- Designing data acquisition pipelines using sensors (analog & digital)
- Developing dashboards and web-based monitoring systems
- Managing hardware integration with ESP32, Arduino, STM32, BLE, SBCs, and Quectel modules
- Creating SOPs and detailed research documentation for project workflows

SKILLS SUMMARY

- Data Acquisition (Analog & Digital Sensors)
- Web Development
- Dashboard Management
- Hands-on with ESP32, Arduino UNO/MEGA/NANO, BLE
- Working knowledge of STM32
- Experience with Quectel SIM modules
- Knowledge of SBCs (Single Board Computers)
- Industrial Communication Protocols

EXPERTISE

- Industry 4.0
- Internet of Things (IoT)
- Project Research & Analysis
- Step-by-Step SOP Development
- Hardware–Software Integration
